FAYLAN

HONSUN[®]

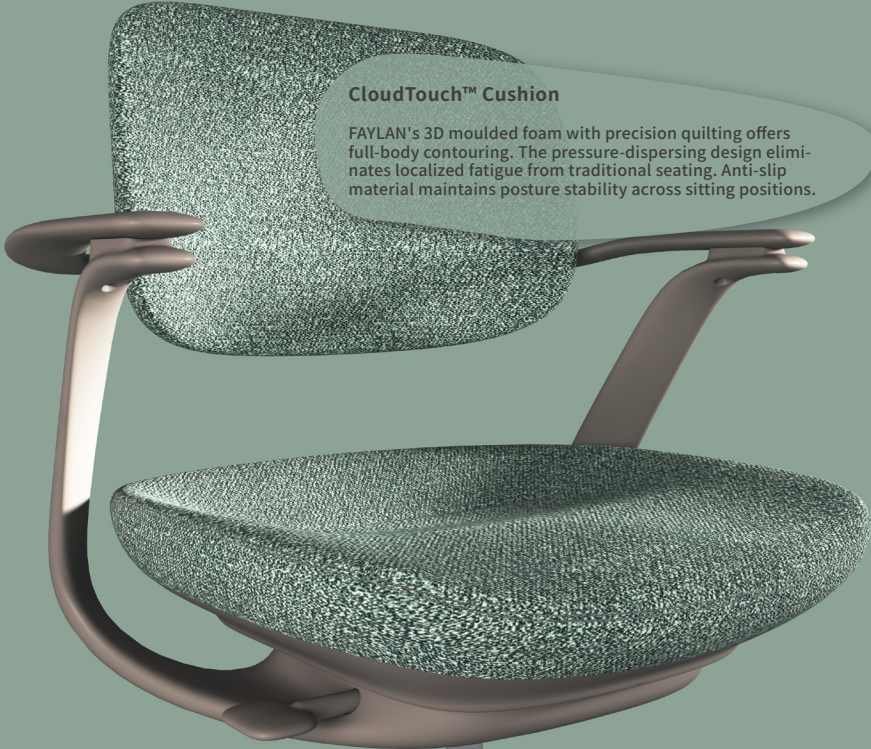

Island Duality Aesthetics

An island adrift, dancing with tides. FAYLAN embraces contradiction's harmony. Where design seeks perfection, we deconstruct.

Chair elements mimic tide-carved rocks, spacing breathes. Gaps whisper island dialogues: forms balancing light and shadow, edges soften into tranquility. Like waves sculpting land, cracks forge harmony.

"FAYLAN" echoes land-sea encounters. Mist weaves through gaps, the chair becomes dawn meeting dusk—a solitary refuge and cosmic thread.

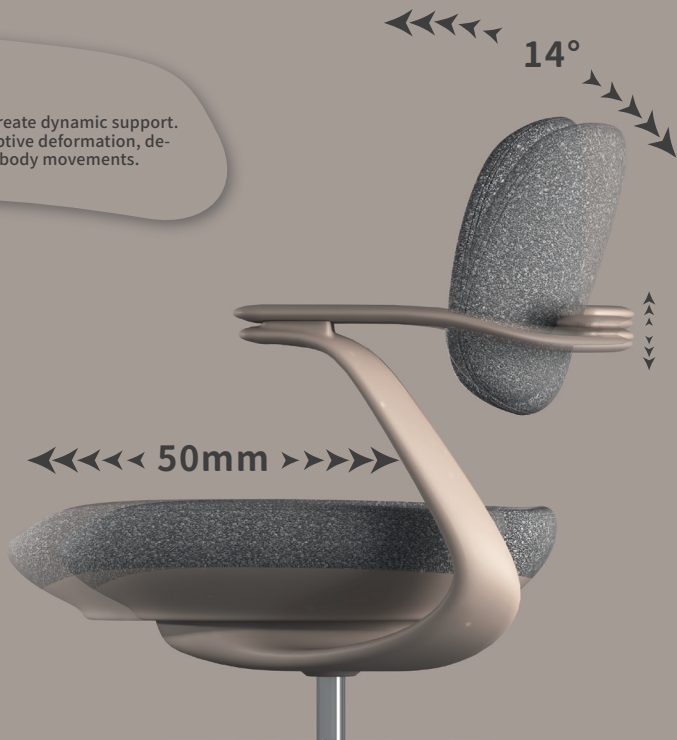

CloudTouch™ Cushion

FAYLAN's 3D moulded foam with precision quilting offers full-body contouring. The pressure-dispersing design eliminates localized fatigue from traditional seating. Anti-slip material maintains posture stability across sitting positions.

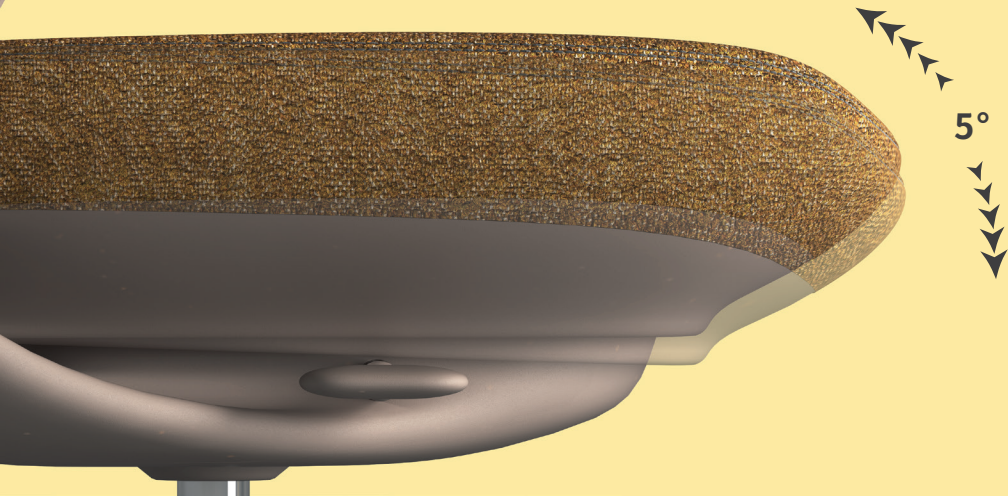

ErgoMag™ Support System

50mm seat glide + 14° backrest tilt create dynamic support. Flexible frame materials enable adaptive deformation, delivering real-time stress response to body movements.

NOD NOD™ Tilt System

5° flexible front edge automatically adjusts to thigh pressure, preventing rigid-edge discomfort during work or rest. Scientifically engineered thigh support solution.

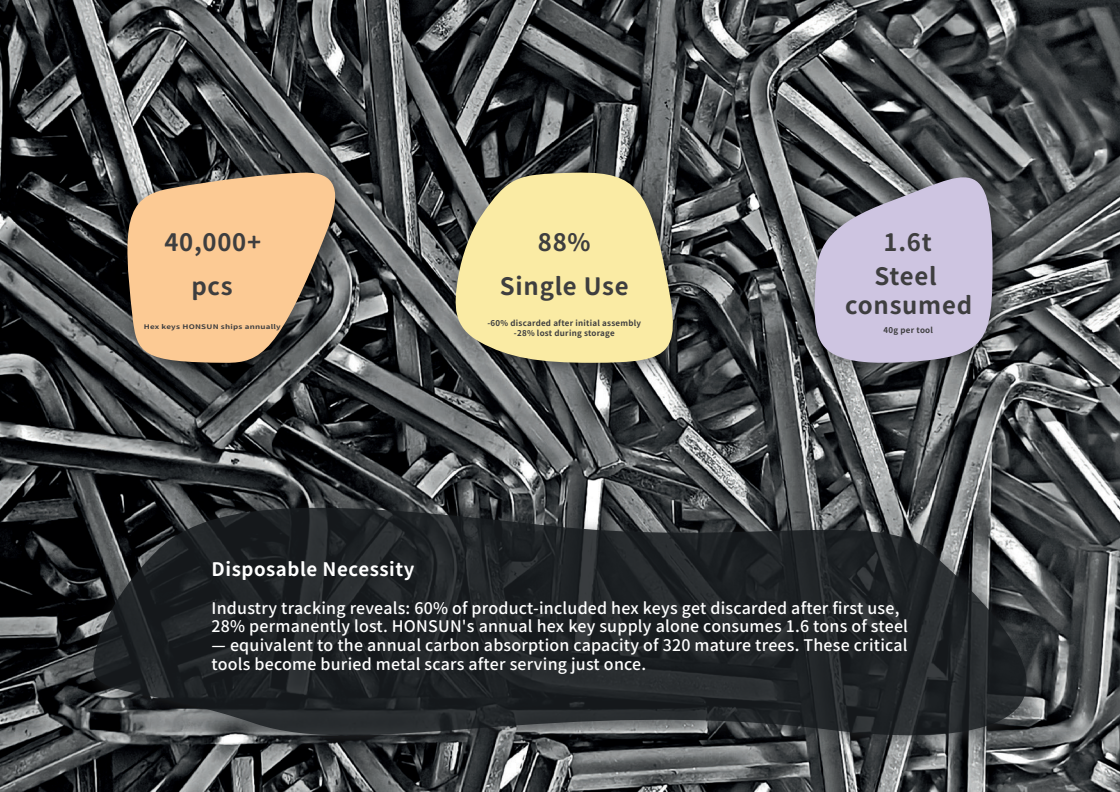

Growth Partner

With 25mm adjustable seat depth and youth-oriented colour options, FAYLAN's dual-aesthetic design supports physical development from study to leisure — a chair that grows with users.

40g per tool

Disposable Necessity

Industry tracking reveals: 60% of product-included hex keys get discarded after first use, 28% permanently lost. HONSUN's annual hex key supply alone consumes 1.6 tons of steel — equivalent to the annual carbon absorption capacity of 320 mature trees. These critical tools become buried metal scars after serving just once.

The 62g Vision

FAYLAN redefines seating design with a lift handle that doubles as a hex tool: twist to adjust, pull to assemble. Its palm-friendly curves and 320% larger grip area eliminate hand strain from traditional tools, empowering teens to customize seats independently.

Weighing just 62g, this innovation cuts the industry's 88% tool waste rate, saving 1.6 tons of steel annually while extending lifespan 18x.

**Space Synergy:
Multi-Scene Adaptability**

FAYLAN seamlessly transitions between offices, schools, homes, and beyond through scenario-engineered versatility.

OFFICE

A high-angle, dimly lit photograph of a modern conference room. A large, dark, oval-shaped table is the central focus, surrounded by eight orange upholstered chairs with black frames. On the table, there is a laptop, a small cup, and some papers. The room has a dark, textured wall and a large window with horizontal blinds on the left, through which bright light is streaming. The floor is a dark, polished material. The word "CONFERENCE" is overlaid in large, white, sans-serif capital letters across the center of the image.

CONFERENCE

EDUCATION

A modern office interior with large windows, wooden ceiling, and contemporary furniture. The space is bright and airy, with a mix of natural and artificial light. The ceiling features a complex, layered wooden structure. The floor is a mix of polished stone and patterned carpet. The overall design is sleek and professional.

BUSINESS

LIVING

A modern office interior with a warm, orange-toned wall and floor. Four different styles of ergonomic chairs are displayed. In the foreground, a black office chair with a five-star base and casters is positioned. Behind it, on a raised platform, are three other chairs: a dark green chair with a three-legged base, a light brown chair with a four-legged base, and a dark grey chair with a five-star base and casters. The word "MORE" is overlaid in large, white, sans-serif capital letters across the center of the image.
